# WELDON

## Hot air welding tool Small – Handy - Precise

The small and handy welding gun for welding of thermoplastic materials for plastic fabricators. Air supply with external blower (Air-Station) or compressed air.

- digital read out of set and actual temperature
- stepless adjustment of electronic controlled temperature
- fatigue-proof welding thanks to ergonomic handle, rotating and flexible air hose
- cooled heater tube
- nozzle position 360° adjustable
- available with 3m or 8m air-hose
- large accessories range

### Technical Data

|                   |  |
|-------------------|--|
| Voltage           | 230/120 V  |
| Frequency         | 50/60 Hz   |
| Power consumption | 1000/600 W   |
| Temperature       | 20–600 °C  |
| Air flow          | min. 40 l/min  |
| Pressure          | max. 1 bar   |
| Size              | 295 x 62 mm  |
| Weight            | 0,75 kg with 3 m cord,<br>air hose and<br>Y-connection |
| Markings          | CE   |
